INDAH WATER TRAINING CENTRE (IWTC) FACILITIES

INTRODUCTION

Indah Water Konsortium Sdn. Bhd. advocates the need to enhance knowledge and skill of staff and practitioners in the sewerage sector to be effective and efficient in planning, operation and maintenance of sewerage assets. For this, Indah Water established a Technical Training Centre at the Sg. Besi Regional Sewage Treatment Works, Bukit Jalil in February 2006. The training centre is a dedicated regional location for technical training on sewerage system that focuses on theory and practical for the staff and wider public.

Indah Water strategy focuses on developing knowledge, skills and competencies to fulfil the business and industry demands. Hence, its training and development program focus on capacity building in areas of customer relations, health and safety, fundamental of sewerage systems to new technology, processes and skills.

TRAINING STRATEGY

Hands-on application training, live demonstration as well as real role-play on simulation could be used to complement and facilitate training and teaching at the Bukit Jalil TTC. This is made possible by the training centre being located within the Regional Sewage Treatment Works and is equipped with sewerage products display room and an experimental laboratory as well as mock sewerage facilities. The laboratory on site could accommodate teaching and training of fundamental laboratory techniques. The mock sewerage facilities allow participants to experience the closest-to-real working situation.

FACILITIES

The mock facilities include:

- Manhole for man entry complete with tripod, safety harness, gas detectors and breathing apparatus.
- Sewer lines of various sizes and depth complete with manual and mechanical rodding tools and machines.
- Septic tanks of various sizes and types.
- Pump stations complete with raw sewage pumps and accessories.
- Electrical control panel with various components, circuit breakers, float switches and motors for simulation exercises.

In addition to the functional trainings, IWTC is also equipped with classroom space outfitted with appropriate presentation technology for the theory-oriented training. The centre has four air-conditioned training rooms which have a total capacity for training 70-100 people depending on the training delivery method. Training could be in the mode of classroom, practical, workshop, or seminar. Various modes of training using white board, flip chart, overhead and Liquid Crystal Display (LCD) projectors as well as video are available and conducted here.

Basic facilities such as an office, foyer, and pantry, praying room, toilet and shower facilities as well as ample car parking space are available. The training centre is continually exploring opportunities to establish additional facilities to provide comfort, convenience and greater access to its training programs.

MULTIPLE LEARNING PROGRAMME

Classes	Seminar
Coaching	Team Building
Consulting	Meetings
Conferences	Events
Courses	Function

INDAH WATER TRAINING CENTRE IWTC FACILITIES

SERVICES

2 coffee breaks
Lunch
A variety of menu offered
6 rooms
157 person can occupied
Material production
Audio
Visual
24 hour free parking
Study Tour of Treatment Plant KLR340
Mock Up facilities

Monday to Sunday
Nearby Light Rail Transit (LRT) Bukit Jalil Station

TARGET AUDIENCE

Facilitator's
Government Agencies
Lecturers
Multi-National Companies
Non-Government Organization's
Private Organization
Trainers
