

## INTRODUCTION

Indah Water Konsortium Sdn. Bhd. advocates the need to enhance knowledge and skill of staff and practitioners in the sewerage sector to be effective and efficient in planning, operation and maintenance of sewerage assets. For this, Indah Water established a Technical Training Centre at the Sg. Besi Regional Sewage Treatment Works, Bukit Jalil in February 2006. The training centre is a dedicated regional location for technical training on sewerage system that focuses on theory and practical for the staff and wider public.

Indah Water strategy is to focus on developing knowledge, skills and competencies to fulfil the business and industry demands. Hence, its training and development program focus on capacity building in areas of customer relations, health and safety, fundamental of sewerage systems to new technology, processes and skills.

## TRAINING STRATEGY

Hands-on application training, live demonstration as well as real role-play on simulation could be used to complement and facilitate training and teaching at the Indah Water Training Centre (IWTC). This is made possible by the training centre being located within the Regional Sewage Treatment Works and is equipped with a mock sewerage facilities. The adjacent laboratory could accommodate teaching and training of fundamental laboratory techniques. The mock sewerage facilities allow participants to experience the closest-to-real working situation.

## FACILITIES

The mock facilities include:

- Manhole for man entry complete with tripod, safety harness, gas detectors and breathing apparatus.
- Sewer lines of various sizes and depth complete with manual and mechanical rodding tools and machines.
- Septic tank model.
- Pump stations complete with raw sewage pumps and accessories.
- Electrical control panel with various components, circuit breakers, float switches and motors for simulation exercises.

In addition to the functional trainings, IWTC is also equipped with classroom space outfitted with appropriate presentation technology for the theory-oriented training. The centre has six air-conditioned training rooms which have a total capacity for training 70-100 people, depending on the training delivery method. Training could be in the mode of classroom, practical, workshop, or seminar. Various modes of training using white board, flip chart, overhead and Liquid Crystal Display (LCD) projectors as well as video are available and conducted here.

Basic facilities such as an office, foyer, and pantry, prayer rooms, toilet and shower as well as ample car parking space are available. The training centre is continually exploring opportunities to establish additional facilities to provide comfort, convenience and greater access to its training programs.

## MULTIPLE LEARNING PROGRAMME

- |             |               |
|-------------|---------------|
| Classes     | Seminar       |
| Coaching    | Team Building |
| Consulting  | Meetings      |
| Conferences | Events        |
| Courses     | Function      |

TRAINING ROOM	CAPACITY
KASAWARI	60 PAX
HELANG 1	30 PAX
TEMPUA	16 PAX
MERAK	28 PAX
MERBOK	24 PAX
MERPATI	18 PAX

## SERVICES

Catered meals  
 A variety of menu offered  
 6 training rooms  
 90-seater dining hall  
 Material production  
 Audio  
 Visual  
 Free parking  
 Study Tour of Treatment Plant KLR340  
 Mock-Up facilities

Nearby Light Rail Transit (LRT), Bukit Jalil Station

## TARGET AUDIENCE

Facilitators  
 Government Agencies  
 Lecturers  
 Multi-National Companies  
 Non-Government Organization's  
 Private Organization  
 Trainers & Training Providers
