

TOPIC : IWK FROM SEWERAGE SERVICES TO ENVIRONMENTAL ENTERPRISE

3 DAYS COURSE

18-20 February 2019

RM1995 Per pax

Course Outline

Jointly Organised by

This course provides an introduction to the wastewater treatment processes, focussing on domestic and industrial sources as they relate to the way wastewater is collected, treated and disposed. Areas of study include: basic descriptions of what is wastewater; why we have to treat wastewater; regulation and act; including sewerage guide and requirement and the processes involved with treating wastewater; disposal of treat effluent; and the collection of wastewater from sources.

Objective

- ❖ Analysing strengths of waste water process and innovation needed in environmental protection ; .
- ❖ Improve capacity and manage irregularities and ensuring uninterrupted operations
- ❖ Introducing current and possible liberalisation of regulation

Course Output

Upon completion of the course, the participant should be able to:

- ❖ develop their own management approach of understanding in handling and managing waste water and effluent effectively in an environmentally sound manner.
- ❖ Use innovative ideas shared for enterprising planning

Key Topic

- ✓ Legal Water Compliances
- ✓ Industrial Wastewater
- ✓ Sewerage Sludge Generation And Treatment
- ✓ Green Technology 2017 Policy

Course Content

Day 01

Lesson Learnt

The History Of Sewerage Treatment
Sewerage Guide and Requirement with Effluent Compliance
Catchment Planning
Industrial Wastewater
Sewerage Treatment Plant

DAY 02

Process of Sewerage Treatment Plant
Sewerage Sludge Generation and Treatment
Sewerage By Products

DAY 03

Site Visit To Sewerage Treatment Plant

10% off.. discount applicable for 3 person in a single registration form
