Confined space can be hazardous than regular workspace for many reasons. To effectively initiate the risks associated with working in a confined space, Authorized Entrant (AE) & Stand-By Person (SP) and Authorized Gas Tester (AGT) and Entry Supervisor (ES) should be implemented. Confined spaces can be found in almost any workplace and not necessarily small like silos, vats, hoppers, utility vaults, tanks, sewers, pipes, access shafts, truck or rail tank cars, aircraft wings, boilers, manholes, manure pits and also storage bins.
